TIMELY TOPICS. THE project of tunneling the British canal is really to be put into execution. The French Government is about to take action in the matter, and French capitalists are ready to join with Eng-lish capitalists in investing money in the enterprise. Although the distance to be tunneled is more than twenty miles it is anticipated that the entire tunnel can be cut through the chalkbeds that underlie the channel. Very rapid progress can thus be made, and the work may very possibly prove less difficult and costly than the tunneling of Mount Cenis, which involved the labor of boring through the lardest known rocks. Prelimicary boring in order to test the question of the exist-

ence of the supposed chalk beds will

be made at once, and the precent gen-

eration may live to see trains running

TOBACCO GROWING WILD IN NEVADA. The tobacco plant appears to be inligenous to Nevada. It grows wild in several parts of this country, and the stalks attain a height of three or four feet in some places, particularly where which requires stamps on bank checks, etc., the soil has been disturbed. The weed but this morning they struck out the contemflourishes along the railroad embankment near Kemler's Mill, where it may speech. The further consideration of the be seen by those who have any euriosity to examine it. The spontaneous growth took up the pension appropriation bill, but to examine it. The spontaneous growth objection was made to the consideration of tubscoo in this soil and climate the bill, and the private calendar was taken up and a number of private bills acted on. its production. Some enterprising hstribution of \$203,334 pro rata, was reported a fair trial next season. Tobacco is a twice daily in London, is not a decepby the committee of the whole. Much oppo-eition was manifested to it, and finally, with-vation in Humboldt county may not be chess-player. That, though it astonimpossible.

stroduced a bill to establish a mint of the RABIES.—Though the sight of a dog almost changes the passive state of hytroduced a joint resolution authorizing the grophobia in any animal to the active, ecretary of the treasury to admit, free of raging condition, there is one recorded nty, the diamond necklace presented by the fact which points to the probability that an animal afflicted with this disease is thrown into a violent state at sight of an individual belonging to the particular species from which poison was received. A horse innoculated with rabies obtained from sheep, and exhibiting the most terrible symptoms of the mslady, showed no disquietade whatever at the sight of a dog. When one was thrown to him he pushed it away with his nose, but a sheep being placed in the same inclosure, he became frantic, and in a dreadful paroxysm of rage he seized it and killed it with one movement of his powerful jaws. This case is in direct opposition to the usual course of things, for animals suffering from rabies have, in all other instances, been excited to madness whenever a dog showed himself. It may be that the constancy of this phenomenon is due only to the fact that the iunoculating

I tried to believe it, but the several duties and rates of duty prescribed hat section, levied without the abatement of by this act shall not apply to any goods, wares or merchandise on board and bound to the United States on the 10th day of February, 1875, nor on any such goods, wares or merto es at the date of the passage of this act. The committee agreed vesterday to favor he repeal of that part of the present law

An Automaton Card-Player.

A Machine Which Plays a Good Game The new automaton, invented by Mr. farmer should procure the seed or some John Nevil Maskelyne and Mr. John hardier cultivated varieties and give it Algernon Clarke, and now exhibited vation in Humboldt county may not be chess-player. That, though it astonished all Europe late in the last and PECULIAR FACT IN THE HISTORY OF early in the present century, was but in part mechanica', and the chess playing was really performed by a man on the inside—a polish patrict named Warousky, who, having lost both his legs n battle, was able to conceal himself in very small spaces within the figure and upon his tongue and swallowed. Then, the box table at which the figure was seated. Neither is the new automaton of the same class with Vauconson's flate-p'ayer, which was exhibited and explained to the French andemy of science in 1738. That superb piece of mechanism imitated the movements of the body, the fingers, the lips, the tongue, and the management of the breath of an expert performer on the flute. Sir David Brewster has recorded the fact that "for many years it continued to delight and astonish the philosophers and musicians of Europe. but, like the barrel-organ, the machine executed only those particular airs which it was arranged to play.

The marvel of the new invention of Mr. Maskelyne and Mr. Clarke consists motion in rubbing downward from the lations, obeys by its movements the dihead, until the blood will be put in rections of any person in the audience, lively circulation, rubbing hardest and accomplishes a number of very surupon the chest. If a towel is not at prising feats with eards chosen and names written by the audience.
